

# REJU Rejuvenation Event(TM)

---

## REJU Rejuvenation Event(TM)

### 20-Day Cohort Daily Instructions

Format: One cohort meeting per day, maximum 10 minutes each.

Language: English (translated and adapted from the Bolivia Health Course - Curso de Salud).

Alignment: Kat's Legacy by Wilson Fischmann CA + REJU Protocol(TM) + Four-Week Reset Program.

Materials folder (Google Drive):

<https://drive.google.com/drive/u/2/folders/1HxxLKwjbbRSd-5QgT7JWhLQA3Heq5X8B>

---

### How to use this guide

- Facilitator leads a 10-minute live session using the teaching points below.
  - Participants complete participant actions the same day.
  - Every action is logged in the Daily Transformation Log with Participant ID.
  - Sessions follow the book chapter sequence while integrating Bolivia course science.
- 

## Day 1 - Welcome, Kat's Legacy & Your Health Benchmark

Duration: 10 minutes max

Kat's Legacy: Introduction

Course source: Curso de Salud - Course Introduction; EVENTO DE SALUD

### Cohort meeting focus

Open the cohort. Introduce the REJU Rejuvenation Event(TM), Kat's story, and the non-negotiable baseline every participant must record today.

### Teaching points (cover in session)

- Kat's Legacy began when Wilson Fischmann refused to accept a brain-dead diagnosis for his daughter Kat - leading to Kat's JOL(TM) and a decade of documented resilience.
- This program is not a quick fix; it is a structured commitment to transformation through the REJU Protocol(TM) and the Four-Week Reset in Kat's Legacy.
- Three maintenance types from the Bolivia course: corrective (repair damage), preventive (stop decline), and autonomous (self-directed longevity).
- The 6-week REJU event: 1 week preparation -> 4 weeks protocol -> 1 week celebration - matching the Health Event structure.
- Establish your Health Benchmark(TM) now: photos, journal, how you feel physically and emotionally - avoid mirrors and scales during the reset; your record is your early-warning system.

### Participant actions (after session)

- Download Kat's Legacy and read the Introduction.
- Take baseline photos and write your starting benchmark in the daily transformation log.
- Save your Participant ID on every entry going forward.

- Join REJU Official on Telegram for live session times.

### **Facilitator note**

End with one Today's Victory - the first of 20+.

---

## **Day 2 - The Lymphatic System - Your Body's Drainage Network**

Duration: 10 minutes max

Kat's Legacy: Chapter 1

Course source: Day 1 - Sistemas del Cuerpo; The Human Body as a City System

### **Cohort meeting focus**

Teach the lymphatic system as the body's garbage collection service - the foundation chapter in Kat's Legacy.

### **Teaching points (cover in session)**

- Imagine your body as a city: lymph nodes are waste-processing plants; lymph vessels are garbage truck routes (Kat's Legacy Ch. 1 + City System doc).
- Key functions: drain waste and toxins, defend against pathogens with immune cells, absorb fats and fat-soluble vitamins.
- Lymph has no central pump - it moves through muscle contractions, movement, and deep breathing. Sedentary life stalls the system.
- Signs of dysfunction: swelling, bloating, frequent infections, fatigue, brain fog - the body is not draining.
- Support: hydration ( $\text{weight kg} \div 30 = \text{liters/day}$ ), movement, deep breaths, and reducing toxic load entering the system.

### **Participant actions (after session)**

- Read Kat's Legacy Chapter 1.
- Practice 5 minutes of deep diaphragmatic breathing today.
- Log lymph-related observations: bloating, swelling, energy - in your daily log.
- Drink your calculated hydration target before noon.

---

## **Day 3 - The Immune System - Innate & Adaptive Defense**

Duration: 10 minutes max

Kat's Legacy: Chapter 2

Course source: Day 1 - Sistema Inmune slides

### **Cohort meeting focus**

Explain the immune system's two-tier defense and why Kat remained remarkably resilient for over a decade.

### **Teaching points (cover in session)**

- First barriers: skin, mucous membranes, stomach acid - the city's walls before invaders enter.
- Innate immunity: immediate, non-specific - fever, inflammation, macrophages, neutrophils, NK cells.
- Adaptive immunity: memory-based - B cells produce antibodies; T cells attack from within. This is the principle behind vaccination.
- Autoimmunity occurs when the system cannot distinguish self from threat - lupus, rheumatoid arthritis, Type 1 diabetes, psoriasis.

- Chronic stress suppresses immunity (cortisol, adrenaline) - mental toxicity directly weakens physical defense.

### **Participant actions (after session)**

- Read Kat's Legacy Chapter 2.
- Note any recurring infections, inflammation, or autoimmune patterns in your benchmark journal.
- Identify one stress source you can reduce today.
- Record Today's Victory related to immune-supporting behavior (sleep, hydration, or stress pause).

---

## **Day 4 - The Digestive System - Foundation of All Health**

Duration: 10 minutes max

Kat's Legacy: Chapter 3

Course source: Day 1 - Sistema Digestivo; Chronic Illnesses article

### **Cohort meeting focus**

Position digestion as the root system - every chronic illness conversation in the course returns here.

### **Teaching points (cover in session)**

- The gut is not just about food - it houses the microbiome, produces neurotransmitters, and connects to immunity and detox.
- Processing time matters: the course teaches ~10 hours for digestion - constant eating never lets the system rest.
- Leaky gut (intestinal permeability) allows toxins and undigested particles into blood - linking diet to systemic inflammation.
- Chronic illnesses - cancer, diabetes, hypertension, obesity, NAFLD - all have documented dietary drivers (Chronic Illnesses article).
- Rule from the Bolivia course echoed in Kat's Legacy: elimination is as important as intake - 'it is more important to eliminate than to swallow.'

### **Participant actions (after session)**

- Read Kat's Legacy Chapter 3.
- Track elimination patterns honestly (frequency, quality) - data, not judgment.
- Begin reducing one processed food category from your intake.
- Log digestive comfort scores in the daily transformation log.

---

## **Day 5 - Physical Toxicity - Hidden Dangers in Food & Environment**

Duration: 10 minutes max

Kat's Legacy: Chapter 4

Course source: Day 1 - Comidas Tóxicas, Metales Pesados, Químicos Industriales

### **Cohort meeting focus**

Wake participants to physical toxicity - you cannot detox a body that keeps ingesting poison.

### **Teaching points (cover in session)**

- Step one of detoxification: stop ingesting toxins. You cannot clean a dirty jar while pouring mud into it.
- Water toxicity: fluoride, BPA bottles, heavy metals - filter and source matter.

- Food toxicity: processed meats (nitrites), farmed fish (PCBs, antibiotics), GMOs, grilled PAHs, hydrogenated oils, microwave popcorn chemicals, non-organic produce (glyphosate).
- Sugar is not food - it is a neurotoxin and the preferred fuel of cancer cells (Warburg).
- Heavy metals (lead, mercury, arsenic) and industrial chemicals (benzene, BPA, phthalates) accumulate silently - cilantro and clean nutrition support chelation.

#### **Participant actions (after session)**

- Read Kat's Legacy Chapter 4.
- Audit your kitchen: list 5 toxic items to remove this week.
- Switch one water or food source to a cleaner alternative.
- Photograph your pantry baseline for your Transformation Book.

---

### **Day 6 - Sugar - Metabolic Damage & the Warburg Effect**

Duration: 10 minutes max

Kat's Legacy: Chapter 5

Course source: Day 1 - Azúcar slides; Robert Lustig research

#### **Cohort meeting focus**

Deliver the sugar session with numbers - participants must feel the weight of daily invisible intake.

#### **Teaching points (cover in session)**

- Americans consume ~141 lbs of sugar per year - one soda daily = ~15.6 lbs of fat equivalent annually (course math).
- Fructose converts to uric acid (gout), raises triglycerides, and drives small dense LDL-B - the dangerous particle.
- Sugar suppresses immunity, feeds cancer preferentially (Warburg: cancer lives in acidic, low-oxygen, high-sugar environments).
- Soda combines caffeine (diuretic) + salt (55 mg) - dual dehydration disguised as refreshment.
- Ketogenic logic: remove sugar -> body must find another fuel -> ketones become available.

#### **Participant actions (after session)**

- Read Kat's Legacy Chapter 5.
- Eliminate all sodas, juices, and added sugar today.
- Read labels - identify hidden sugars in sauces, breads, and 'health' products.
- Log mood and energy shifts as sugar clears - expect a rollercoaster.

---

### **Day 7 - Mental Toxicity, Stress & Emotional Eating**

Duration: 10 minutes max

Kat's Legacy: Chapter 4 (Mental Toxicity)

Course source: Day 1 - Toxicidad Mental, Estrés; Day 3 - Salud Mental

#### **Cohort meeting focus**

Address the invisible toxin - stress-driven eating and the mind as governor vs. instrument.

### Teaching points (cover in session)

- When stressed, the sympathetic system activates fight-or-flight: blood leaves digestion, immunity suppresses, cortisol and adrenaline surge.
- Emotional eating satisfies a feeling, not hunger - when the emotion returns, the cycle repeats (course: 'eating for satisfaction').
- Chronic stress manifests physically: headaches, ulcers, hair loss, irregular cycles, hypertension, insomnia, acne.
- Reframe from the course: the mind as instrument, not governor - Wayne Dyer (Power of Intention), Eckhart Tolle (Power of Now).
- Two focus modes for problems: 'why is this happening to me' vs. 'how can I resolve this' - only the second heals.

### Participant actions (after session)

- Identify your top stress-eating trigger and write it in your log.
- Practice 10 minutes of stillness, breath work, or the 'O' meditation system from the course.
- Record Today's Victory that is emotional, not food-related.
- Reach out on Telegram if you need cohort support today.

## Day 8 - Water, Hydration, pH & Alkaline Foundations

Duration: 10 minutes max

Kat's Legacy: Chapter 11

Course source: Day 2 - Agua; Day 3 - Agua formula; El Agua Y sus Secretos

### Cohort meeting focus

Water is the master carrier - structured, mineralized, alkaline water supports every other system.

### Teaching points (cover in session)

- Hydration formula (course):  $\text{body weight in kg} \div 10 \div 3 = \text{liters daily}$  (e.g., 90 kg  $\rightarrow$  3 L). Book:  $\text{kg} \div 30$  or half body weight in oz.
- Morning ritual: warm water + lemon + pinch of Himalayan salt - activates digestion and remineralizes.
- Acidity drives osteoporosis, gout, and creates hostile terrain - Otto Warburg linked acidic environments to disease.
- Alkaline, structured water supports lymph flow, nutrient delivery, and detox pathways (Kat's Legacy Ch. 11).
- Apple cider vinegar (2 tbsp in water, morning) and celery juice support gut pH balance per course protocol.

### Participant actions (after session)

- Read Kat's Legacy Chapter 11.
- Calculate your personal water target and hit it today.
- Start morning lemon-salt water ritual.
- Log skin dryness, mouth dryness, and urine color - body's hydration language.

## Day 9 - Colon Health, Elimination & Detox Pathways

Duration: 10 minutes max

Kat's Legacy: Chapter 10

Course source: Day 2 - Limpieza del Colon, Desintoxicación; Curso de Salud GUIDE

### **Cohort meeting focus**

The colon is the exit door - if blocked, every upstream system fails. Preparation for Week 1 detox.

### **Teaching points (cover in session)**

- Colon toxicity links to systemic disease - 5-25 lbs of accumulated waste is common before a proper cleanse (course reference).
- Tools: prunes (5 after meals, adjust up/down), colon hydrotherapy/colonics on Day 3 of preparation, magnesium, triphala, plum juice.
- Stop toxins in -> give digestion rest (10-hour processing window) -> flush with water -> support with antioxidants.
- Probiotic foods: kombucha, kefir, kimchi, sauerkraut, yogurt - rebuild the gut after cleansing.
- Sauna, coffee enemas (Gerson tradition), and sweating support elimination through skin - the third detox organ.

### **Participant actions (after session)**

- Read Kat's Legacy Chapter 10.
- If in Preparation Phase: follow prune protocol and schedule colon cleanse for Day 3.
- Add one fermented food to your day.
- Log elimination quality - this is clinical data for your benchmark.

## **Day 10 - Kat's JOL(TM) - The Juice of Life**

Duration: 10 minutes max

Kat's Legacy: Introduction + Four-Week Reset / Kat's JOL Recipe

Course source: Day 2 - KAT'S JOL, La Receta Milagrosa; Kats JOL.txt

### **Cohort meeting focus**

Introduce the cellular nutrition formula that sustained Kat and reversed Wilson's own health markers.

### **Teaching points (cover in session)**

- Kat's JOL combines kale, moringa, leafy greens, beets, peas, apple, ginger, citrus, celery, carrot, banana, cucumber, zucchini, cilantro, parsley, chia, flax, lemon, spinach, dates, maca, and turmeric with pepper.
- Prepare with alkaline water - yields three 500 ml servings: morning, midday, ~5 PM (last food of the day).
- Vegetable soup (weekly, 3x): chard, kale, squash, zucchini, cucumber, onion, garlic, celery, potatoes with skin, cabbage, carrot, herbs - cooked with pink salt only.
- Bone broth (osso buco, 2 hr simmer, marrow crushed back in): 2 servings, twice weekly - deep mineral support.
- Wilson tested JOL on himself before giving it to Kat - lab results documented cholesterol, PSA, and vitality improvements.

### **Participant actions (after session)**

- Read the Kat's JOL recipe section at the end of Kat's Legacy.
- Source ingredients and prepare your first JOL batch - or confirm your supply chain.
- Photograph your first JOL - Transformation Book chapter moment.
- Begin Week 1 JOL schedule if preparation phase is complete.

---

## Day 11 - Superfoods, Ferments & Cellular Nutrition

Duration: 10 minutes max

Kat's Legacy: Chapters 3, 6, 11

Course source: Day 3 - Nutrición, Súper alimentos; Curso de Salud GUIDE - Nutricion

### Cohort meeting focus

Beyond JOL - the seven nutrients, superfoods, and why nutrient density beats calorie counting.

### Teaching points (cover in session)

- Seven essential nutrients framework from the course - vitamins, minerals, protein, fats, carbohydrates (quality not quantity), water, and oxygen.
- Superfoods in the protocol: wheatgrass, mushrooms (Chaga), chia, turmeric, ginger, maca, spirulina, flax, cilantro (metal chelation), He Shou Wu, goji, black garlic, broccoli.
- Kale alone delivers 200% vitamin A, 134% vitamin C, 684% vitamin K per cup - why it anchors JOL.
- Ferments rebuild microbiome: kefir, kombucha, kimchi, sauerkraut - living food vs. dead processed calories.
- Deficiency awareness: magnesium, zinc, vitamin D, iodine - many medications deplete these (course drug-induced deficiency chart).

### Participant actions (after session)

- Add one new superfood from the list to today's JOL or meal.
- Read Kat's Legacy Chapter 6 (Energy & Digestion).
- Log energy before and after meals - notice fatigue vs. fuel.
- Note which ingredients your body responds to positively.

---

## Day 12 - Autophagy - Your Cellular Recycling System

Duration: 10 minutes max

Kat's Legacy: Chapter 7

Course source: Day 2 - Autofagia, Nobel Ohsumi; Curso de Salud GUIDE - Healing Methods

### Cohort meeting focus

Introduce the Nobel Prize science that underpins the fasting windows in the REJU Protocol(TM).

### Teaching points (cover in session)

- Autophagy (Greek: 'self-eating') - cells recycle damaged components, reduce inflammation, and renew structure (Yoshinori Ohsumi, Nobel 2016).
- Activation timeline: 0-12 hrs glycogen use; 12-16 hrs fat transition; at ~16 hrs autophagy begins meaningfully.
- Fasting tiers from the course: 8-hr eating window -> 4-hr window -> one meal per day - each deepens the clean-up.
- Hippocrates: 'Our food should be our medicine' - Plutarch: 'Instead of medicine, fast a day.'
- Shinya Yamanaka (Nobel 2012): mature cells can be reprogrammed to stem-like state - the science of cellular rejuvenation.

### Participant actions (after session)

- Read Kat's Legacy Chapter 7.

- If on Week 1: maintain 16:8 fasting with Kat's JOL - note the hour you last eat.
- Log mental clarity and inflammation changes as fasting windows hold.
- Record any emotional resistance to fasting - normal, document it.

---

## Day 13 - Preparation Complete - Week 1 Detoxification Begins

Duration: 10 minutes max

Kat's Legacy: Four-Week Reset - Preparation & Week 1

Course source: EVENTO DE SALUD - 1ra Semana; 4 Week Program doc

### Cohort meeting focus

Launch Week 1: 16:8 fasting, three Kat's JOL servings, and the physiological map for Days 1-7.

### Teaching points (cover in session)

- Preparation recap: warm lemon-salt water, prunes, Day-3 colon cleanse - colon must be ready.
- Week 1 schedule: Mon-Sun JOL servings per EVENTO DE SALUD table - Thu reduces midday; Fri-Sat skip midday.
- 16 hours fasting / 8 hours eating - body clears toxins, depletes glycogen, begins autophagy at hour 16.
- Avoid mirrors and scales - trust the process; your written benchmark detects drift.
- Three live touchpoints per week in the REJU event - this daily session is your fourth anchor.

### Participant actions (after session)

- Follow today's JOL volume from the Week 1 schedule table in Kat's Legacy.
- Complete full daily transformation log with photos.
- Confirm 16-hour fast window - write eating window times.
- Share one observation on Telegram (optional but encouraged).

---

## Day 14 - Ketosis - Fat as Clean Fuel

Duration: 10 minutes max

Kat's Legacy: Chapter 8

Course source: Day 3 - Cetogenia, Cocina Cetogénica; Day 2 - Ayuno

### Cohort meeting focus

Week 2 preview and ketosis science - the brain runs on ketones, not just glucose.

### Teaching points (cover in session)

- Ketosis: liver converts fat to -hydroxybutyrate, acetoacetate, acetone - anti-inflammatory brain and body fuel.
- Carbohydrate ceiling: ~20-50 g/day to maintain ketosis (Kat's Legacy Ch. 8).
- The brain uses glucose OR ketones - coconut oil and MCTs supply ketones; Dr. Mary Newport's Alzheimer's case used ketones for cognitive recovery.
- Ketogenic kitchen rules from course: no high-glycemic ingredients; max 25 g glycemic load per portion; cook low-temperature to preserve enzymes.
- Week 2 protocol: 20-hour fast, 4-hour eating window, three 500 ml JOL servings - deepest autophagy week.

### Participant actions (after session)

- Read Kat's Legacy Chapter 8.
- If entering Week 2: compress eating to 4-hour window today.
- Remove remaining high-carb items from your environment.
- Log ketosis signals: mental clarity, reduced bloating, breath change, energy stability.

---

## Day 15 - Cellular Repair & The Body's Healing Intelligence

Duration: 10 minutes max

Kat's Legacy: Chapter 9

Course source: Day 2 - Neuroregeneración, Yamanaka; Chronic Illnesses article

### Cohort meeting focus

The body heals itself when given the environment - surgery holds tissue; nutrition and fasting do the repair.

### Teaching points (cover in session)

- Heart surgery sutures do not heal - they hold tissue while the body repairs (Chronic Illnesses article opening).
- Apoptosis: programmed cell death removes damaged cells - autophagy and ketosis support this precision.
- Neuroregeneration: peripheral nerves can regrow; ketones support brain repair (course + Newport case).
- Skin rejuvenation is external proof of internal repair - daily photos capture what memory forgets.
- Week 2 spiritual recommendation from Kat's Legacy: meditation, prayer, gratitude - stress reduction amplifies repair.

### Participant actions (after session)

- Read Kat's Legacy Chapter 9.
- Take comparison photos - same angles as Day 1.
- Practice 10-minute gratitude meditation or prayer.
- Log skin clarity, inflammation, and energy scores - trend over single days.

---

## Day 16 - Mental Health, Meditation & Emotional Sustainability

Duration: 10 minutes max

Kat's Legacy: Chapter 6 + Four-Week Reset spiritual notes

Course source: Day 3 - Salud Mental; Curso de Salud GUIDE - Meditation (Wim Hof, Tolle, Dyer)

### Cohort meeting focus

Sustainability requires mental architecture - air, water, food in that order; 3 minutes without air, 3 days without water, 30 days without food.

### Teaching points (cover in session)

- Warning signs of mental health strain: sleep changes, isolation, numbness, unexplained pain, hopeless thoughts - seek professional help when needed.
- Meditation tools from course: Wim Hof Method (breath + cold), Eckhart Tolle (present moment), Wayne Dyer (intention), Anthony Robbins (Awaken the Giant Within).
- The Gospel of Thomas teaching (course spirituality): make inner like outer - alignment of imagined self and physical action.
- Sustainability = habits that survive after the event - ketogenic cooking, enzyme-preserving temperatures, pink

salt + quality fats, glycemic discipline.

- Week 3 begins digestive reactivation - light solids while maintaining 16:8 and ketosis benefits.

### **Participant actions (after session)**

- Read Kat's Legacy Chapter 6 (Energy & Digestion).
- Try one meditation method from today's session - log how you feel after.
- If on Week 3: introduce first light ketogenic meal per schedule.
- Write your sustainability plan: what habits continue after Day 20?

## **Day 17 - Week 3-4 Transition - Soups, Broth & Ketogenic Meals**

Duration: 10 minutes max

Kat's Legacy: Four-Week Reset - Weeks 3 & 4

Course source: EVENTO DE SALUD - 3ra y 4ta Semana; 4 Week Program doc

### **Cohort meeting focus**

Guide the gentle return to solids without losing ketosis, autophagy, or digestive gains.

### **Teaching points (cover in session)**

- Week 3: reduce JOL volumes, introduce ketogenic meals (meat + vegetables) on Sat-Sun per schedule - 16:8 maintained.
- Week 4: morning JOL -> bone broth midday -> ketogenic dinner; vegetable soup 3× weekly; full ketogenic meals by weekend.
- Bone broth and vegetable soup provide collagen, minerals, and amino acids without shocking the gut.
- Sunday Week 3 optional: coffee colonics, sauna, massage - deep elimination celebration.
- Digestive reactivation 'wakes' the gut microbiome without overload - slow reintroduction is discipline, not weakness.

### **Participant actions (after session)**

- Follow your week's schedule table from Kat's Legacy Four-Week Reset.
- Prepare bone broth or vegetable soup if scheduled this week.
- Log digestive response to reintroduced solids - bloating, energy, satisfaction.
- Maintain 16-hour fasting window regardless of food form.

## **Day 18 - Your Body's Language - Alerts, Benchmarks & Longevity**

Duration: 10 minutes max

Kat's Legacy: Four-Week Reset - Final Reflections + Introduction goals

Course source: Curso de Salud GUIDE - Longevidad; Day 1 longevity alerts

### **Cohort meeting focus**

Teach participants to read signals - dry mouth, skin spots, fatigue, cravings - as communication, not noise.

### **Teaching points (cover in session)**

- Body alerts: dry mouth, dry skin, spots, aches, acne, fatigue, hair loss - each is a message, not random bad luck.
- Reset the alarms by responding with protocol adherence - not suppression with snacks or stimulants.

- Shift attention from taste pleasure to body need - the course calls this transforming gustatory attention to cellular necessity.
- Track elimination vs. intake volume - the Bolivia rule: elimination priority over ingestion.
- Define your optimal health baseline - a vitality state you can recognize, feel, and return to (Kat's Legacy Introduction).

#### **Participant actions (after session)**

- Re-read your Day 1 benchmark - compare honestly to today.
- List 3 body signals you now understand that you ignored before.
- Update Health Benchmark(TM) scores in daily log.
- Set your post-event maintenance non-negotiables (3 items max).

## **Day 19 - Healing Methods, Faith & the Rejuvenation Mindset**

Duration: 10 minutes max

Kat's Legacy: Chapters 7-10 synthesis

Course source: Day 2 - Gerson, Warburg, Burzynski; The 4 Weeks Program spirituality

#### **Cohort meeting focus**

Connect science to spirit - gratitude, intention, and the 21-day habit architecture of transformation.

#### **Teaching points (cover in session)**

- Healing traditions converge: Gerson (plant nutrition), Warburg (oxygen + alkaline + no sugar), fasting (autophagy), JOL (cellular density).
- 21-day significance from course: 3 weeks × 7 days - habit formation, adulthood metaphor, pattern completion.
- Masaru Emoto water intention (Kat's JOL preparation): consciousness in preparation affects the healing vehicle.
- Faith in healing = knowing repair is underway while symptoms fluctuate - gratitude before evidence.
- REJU Longevity Group(TM) is the bridge from event to life - this week prepares that handoff.

#### **Participant actions (after session)**

- Write a gratitude letter to your body - include it in your Transformation Book.
- Review all 19 prior daily log entries - notice the arc.
- Prepare celebration week intentions: how will you honor completion?
- Confirm book authoring password works for daily log submission.

## **Day 20 - Celebration, Maintenance & Authoring Your Legacy**

Duration: 10 minutes max

Kat's Legacy: Four-Week Reset - After Completion + Full book arc

Course source: EVENTO DE SALUD - celebration week; Curso de Salud - 6-week structure

#### **Cohort meeting focus**

Close the 20-day instruction arc. Transition from cohort meetings to autonomous maintenance and book completion.

### **Teaching points (cover in session)**

- Compare baseline photos and journal to today - the Transformation Book is already being written.
- Celebration week is not abandonment - it is integrated maintenance: ketogenic habits, JOL or soups, fasting rhythm, hydration.
- Corrective / preventive / autonomous maintenance (Day 1) - you now operate in autonomous mode with REJU support.
- Day 42 of the full 6-week event: contact REJU to compile your Personalized Transformation Book(TM).
- Kat's legacy lives through your documented transformation - science and love merged into your chapters.

### **Participant actions (after session)**

- Take final comparison photos for this 20-day instruction arc.
- Download and archive all cohort materials from the Google Drive folder.
- Submit today's daily log with a comprehensive Today's Victory.
- Schedule your REJU Longevity Group(TM) continuation path on Telegram.

### **Facilitator note**

Congratulate the cohort. Preview the next 22 days of the full 42-day event protocol.
